

keUS[®]

Smart is the new home

Welcome to our world

About us

Keus was founded in 2017 with a vision to build the world's best smart home solution for premium and luxury spaces in India. Keus was founded by the former promoters of Beam Fiber, a leading internet service provider in India, along with a team of technology entrepreneurs from IIT.

Keus is a smart home solution system that offers a complete range of best-in-class wireless home automation solutions. Every single Keus product is designed with a distinctive purpose to elevate the living experience of a modern Indian home.

Today, Keus is the leading smart home solution company in India for all luxury and premium residences.

Elevating life through transformatory living

We believe, a home is a gorgeous story waiting to unfold and every inch of it has an ability to express an experience.

The core purpose at Keus is to elevate the living experience of our customers. We live with that spirit every single day. Every pixel of our organisation is driven by deep customer empathy and that reflects in everything we do. It is this empathy that inspires us to create products and design solutions that are beautiful, meaningful, enduring and magical. We adopt the principles of inclusive design into everything we create because we believe as Frank Chimero said "People ignore design that ignores People".

As our story continues to evolve, it will always be guided by our vision to be the undisputed leader in smart living and propelled by our desire to deliver living experiences that our customers will love.

Beautiful meets beautiful

A home becomes an aesthetic marvel when every single element comes together to define its character. Such exclusive homes deserve the most beautiful consoles.

Colours that enhance

An array of luxurious colours that blend into any design theme and accentuates its aesthetic.

Finishes that blend

Your home could be contemporary or classic,
eclectic or minimalistic, bohemian or modern.
The smart console just blends in.

A range, complete by design.

A home doesn't need more choices,
it needs the right ones.

From entrances to bedsides, from corridors to
quiet corners, the smart console small and smart
console medium are thoughtfully designed to
meet every need.

Inclusive design

Designed for easy adoption
and easy use.

Seamless proximity

Comes alive in your presence.
