

The background features a dark gray field with a subtle grid of small dots on the left side. Overlaid on this are several thin, light gray concentric circles that originate from the left edge and expand towards the right, creating a sense of depth and movement.

Ambience made easy

with Keus Zigbee wireless technology

A close-up, high-angle shot of a square, black Keus Zigbee chip mounted on a complex circuit board. The chip has the text 'KEUS®' and 'zigbee' printed on it in white. The circuit board is densely packed with various components and traces, creating a complex, geometric pattern. The lighting is dramatic, highlighting the chip and the intricate details of the board.
