*The Essential
Collection*

Conventional Switches, Designed to Belong.

ONE Home, Identity.

Every home needs conventional switches and sockets, not just smart keypads, the socket beside your bedside console, charging your phone or powering a lamp, is just as permanent and visible a part of the room. Most automation brands stop at the keypad, leaving the rest of the wall to whatever the electrician sources locally, which is why a beautifully designed console so often sits next to a mismatched, generic switch, like two different decades on the same wall. Keus refused to leave that gap.

Essential is built in-house, on the same tooling and in the same finishes as Ethos and Elemental, so the keypad and the socket beside it belong to the same design story. That's the extra mile no one else bothered to walk, **Essential** and Non Negotiable in every Keus Home.
